

## **Installation Instructions for SmartRail**

*The SmartRail can be spa mounted or deck mounted by simply rotating the mounting bracket in the appropriate direction.*

Step 1: Insert the SmartRail into the bracket and insert the two 3/8" x 2 3/4" bolts, washers and nylock nuts and tighten firmly.

Step 2: Using the twelve #10 x 1" screws, attach the mounting bracket to the spa. Note: Due to the varying strengths of spa cabinets, additional backing material installed behind the spa cabinet and the bracket may be necessary.

Step 3: With the SmartRail mounted in place, insert the two #10 x 5/8" self tapping screws into the bracket. (This eliminates any movement the SmartRail may have in the bracket).

Step 4: Snap on all the black bolt and screw covers and you are done.
